

Question – 4:

Start by giving the top command to get a detailed information about the process that are currently running.

```
Activities Terminal Jan 31 10:09
kishore@kishore-virtual-machine: ~/Desktop
kishore@kishore-virtual-machine: ~/Desktop$ top
```

Then, press shift + M to sort the table output based on memory usage percentage.

```

Since the top command is interactive, we can easily customize the output with just a single key. To kill a particular process, the key to be used is K. Press the key K from the keyboard.

```
